Occupational and Environmental Medicine

Including a 12-hour Module on Pain Management

November 15-17, 2006
Holiday Inn
Golden Gateway Hotel
San Francisco, CA

This course will review important and timely topics in occupational and environmental health that are of interest to the practicing clinician, occupational health consultant, public health practitioner, or researcher. The topics will address significant recent advances and updates in the fields of occupational and environmental safety and health. In addition, this course will provide a unique, intensive module covering topics related to pain diagnosis and management in the occupational context.

In addition to occupational medicine specialists, this course is also designed to meet the needs of primary care physicians including family physicians, general practitioners, internists, nurse practitioners, industrial hygienists, and other health professionals in the field of occupational and environmental health and safety.

This course is presented by the Department of Medicine and Division of Occupational and Environmental Medicine at the University of California, San Francisco.
