

Occupational and Environmental Respiratory Disease and Occupational and Environmental Medicine Update

Holiday Inn Golden
Gateway Hotel
San Francisco, CA

March 27-29, 2008

This course is designed to provide the experienced clinician with a review of clinical toxicology, epidemiology, and the evaluation of occupational and environmental diseases and injuries. The curriculum will also include a substantial component focused on issues specifically pertinent to occupationally and environmentally-related respiratory disease.

This course is presented by the Department of Medicine and Division of Occupational and Environmental Medicine at the University of California, San Francisco.

This course is designed to meet the needs of occupational medicine specialists as well as primary care physicians including family physicians, general practitioners, internists, nurse practitioners, industrial hygienists, and other health professionals in the field of occupational and environmental health and safety.

OBJECTIVES Upon completion of this course, attendees will be able to:

- Provide update to OEM Health Professionals on clinical issues relevant to the discipline;
- Provide concentrated focus on respiratory disease in the context of occupational and environmental health;
- Delineate key risk factors associated with adverse health in relation to work and the environment;
- Delineate emerging occupational and environmental health issues.
