# Occupational and Environmental Medicine Update and Construction Industry: Old and Emerging Occupational Hazards

Holiday Inn Golden Gateway Hotel  
San Francisco, CA

March 17-19, 2011

This course, presented by the Division of Occupational and Environmental Medicine in the Department of Medicine at the University of California, San Francisco, is designed to provide occupational health professionals with a review of clinical toxicology, epidemiology, and the evaluation of occupational and environmental diseases and injuries. The curriculum will also include a substantial component focused on issues specifically pertinent to the health of construction workers.

This course is approved for American Board of Preventive Medicine Maintenance of Certification credit and is a comprehensive update for occupational medicine specialists. In addition to occupational medicine specialists, this course is also designed to meet the needs of primary care providers and others engaged in occupational health practice and research including physicians (family physicians, general practitioners, internists, emergency medicine specialists), nurse practitioners and other nursing professionals, physician's assistants, industrial hygienists, and health care researchers and policy makers.

## OBJECTIVES

Upon completion of this course, attendees will have:

- Improved medical knowledge derived from research findings, particularly from toxicological and epidemiologic investigations;
- Increased skills to evaluate scientific data in the field of occupational and environmental health;
- Practice application in clinical diagnostic methods and improve treatment options for selected occupational and environmental conditions.
